

PLANET SCIENCE

NEW
RELEASE

From the makers of the popular *Naked Science* programs comes this powerful new series that answers some of the most provocative questions facing mankind today.

Using carefully researched CGI reconstructions, expert contributions and the latest scientific thinking and techniques, major past and predicted events and phenomena are examined in detail.

Each episode examines a particular topic: from the most violent and dangerous planets in our solar system to glacial meltdown; the technology behind space probes to the birth of the solar system and finally, our atmosphere and the thin blanket of air that protects us from solar radiation.

Grand Canyon

The Grand Canyon is one of the world's most famous natural wonders, yet little is known about its formation. Over 1.5 kilometres deep and 322 kilometres long, it is the deepest scar on the globe and contains a complete history in one place. (50 minutes)

- DVD Format \$88.00 BRD210
- Digital Format \$110.00 BRL573

Meltdown

Glaciers across the world are melting, with catastrophic effect. If all the ice in the world melted, what could happen and how would it affect major cities like London and New York? It has happened to our planet before, so can it happen again? (50 minutes)

- DVD Format \$88.00 BRD207
- Digital Format \$110.00 BRL570

Our Atmosphere

The earth's atmosphere protects us from solar radiation and controls our weather, but also affects all life on the planet. Yet it is only a thin blanket of air, the equivalent thickness of a coat of varnish on a model globe. (50 minutes)

- DVD Format \$88.00 BRD212
- Digital Format \$110.00 BRL575

The Rockies

The Rockies are magnificent, awe-inspiring and mysterious. This episode investigates the geological processes that built one of the longest mountain ranges in the world and explores the mysteries of these ancient mountains. (50 minutes)

- DVD Format \$88.00 BRD211
- Digital Format \$110.00 BRL574

Birth of The Solar System

Where did our solar system come from? This episode takes a journey into the heart of the astronomical bodies that make up our solar system, and provides a detailed look at how it all formed. (50 minutes)

- DVD Format \$88.00 BRD209
- Digital Format \$110.00 BRL572

Deadliest Planets

The most violent and dangerous planets in our solar system are Venus, Jupiter and Neptune. How were they formed, why are they are so deadly and why can't they sustain life. Is it possible to make other planetary environments more like our own? Travel our solar to see what it would take to live on a neighbouring planet. (50 minutes)

- DVD Format \$88.00 BRD206
- Digital Format \$110.00 BRL569

Deep Space Probes

An investigation into the technology behind space probes – Voyager, Pioneer, Helios and the latest generation such as Mars Rover – and their astonishing discoveries. Learn about the human story of the people who launched them, their passions and the challenges they faced as they journeyed into uncharted territory. (50 minutes)

- DVD Format \$88.00 BRD208
- Digital Format \$110.00 BRL571

NAKED SCIENCE

Naked Science follows leading experts and researchers as they uncover the facts and destroy the myths about some of the most popular and controversial scientific topics of our time.

11x 50 minute programs

Produced by Robert Strange
©2004-2005 Pioneer Film & Television Ltd, UK

Landslides

The cause of Australia's worst ever landslide in Thredbo was finally traced to a leaking water main. In the Canary Islands, scientists believe the entire mountain side could collapse into the sea.

- DVD Format \$77.00 PED218
- Digital Format \$99.00 PEL525

Pyramids

Naked Science sets out to uncover four great mysteries: how were they built, who built them, why were they built, and what secrets may still lie hidden.

- DVD Format \$77.00 PED216
- Digital Format \$99.00 PEL526

Tsunami Warning

When the Tsunami hit Southern Asia on December 26, 2004 it killed over 250,000 people. Which areas are most at risk from a tsunami and what will help us predict them in the future.

- DVD Format \$77.00 PED214
- Digital Format \$99.00 PEL527

Volcano Alert

Examines how each volcano prediction method helps scientists complete the jigsaw picture of when an eruption may happen.

- DVD Format \$77.00 PED217
- Digital Format \$99.00 PEL528

What is Human?

Naked Science meets three of our earliest ancestors: Lucy in Ethiopia, Turkana Boy from South Africa, and the 60,000 Year Old Man. Which of these ancestors is the first of our kind?

- DVD Format \$77.00 PED211
- Digital (Divx) Format \$99.00 PEL534

NAKED SCIENCE SERIES 2

- Set of 6 DVDs \$396.00 PED213
Digital Format \$495.00 PEL522
or available individually

The Big Freeze

Our oceans constantly flow in a circuit called the Great Ocean Conveyor. When this system shuts down, it triggers massive climatic changes around the world.

- DVD Format \$77.00 PED219
- Digital Format \$99.00 PEL524

The Birth of Earth

What did it take to make a world that would support human life? This program takes an imaginary 'human' time traveller on a journey back to the moment of formation of our solar system.

- DVD Format \$77.00 PED215
- Digital Format \$99.00 PEL523

Angry Earth

Angry Earth looks at what triggers an earthquake, explains the Richter Scale and revisits some of the planet's greatest ever earthquakes.

- DVD Format \$77.00 PED208
- Digital Format \$99.00 PEL530

Angry Skies

What is the fastest wind ever experienced? Hurricanes are vast but they are not as fast as tornadoes. Which is the bigger killer?

- DVD Format \$77.00 PED209
- Digital Format \$99.00 PEL531

The Earth's Core

Two thousand miles below the Earth's surface, there is a vast ocean of molten iron. Learn about a proposed mission to the centre of the earth to find some answers.

- DVD Format \$77.00 PED212
- Digital Format \$99.00 PEL532

Super Volcanoes

Over 20 super volcanoes have been recorded with over half of these occurring in the United States. Can we predict when the next eruption is due?

- DVD Format \$77.00 PED210
- Digital Format \$99.00 PEL533
